I usually do not leave reviews for apps but I just had to with this one. As a super small business, every dollar counts for your bottom line and my biggest expense is shipping costs. The amount of money I am saving with this app is honestly unreal. I was skeptical about the amount it would really save as in the past the shipping apps that claim to save you I found actually cost more in the long run....this one truly saves you money...I'm usually saving at least a few dollars...No problems so far and have been 110% happy with the app.
